

ENERGY CREDITS

[Energy Star Website](#)

Qualified Energy Efficient Improvements

Did you receive a home energy credit in tax years 2006, 2007, 2009, 2010?			YES	NO
from Form 5695 line 2b	TAX CREDIT AMOUNT 2006	+	_____	_____
from Form 5695 line 2b	TAX CREDIT AMOUNT 2007	+	_____	_____
from Form 5695 line 2b	TAX CREDIT AMOUNT 2009	+	_____	_____
from Form 5695 line 2b	TAX CREDIT AMOUNT 2010	+	_____	_____
from Form 5695 line 2b	TAX CREDIT AMOUNT 2011	+	_____	_____
from Form 5695 line 2b	TAX CREDIT AMOUNT 2012	+	_____	_____
from Form 5695 line 2b	TAX CREDIT AMOUNT 2013	+	_____	_____
from Form 5695 line 2b	TAX CREDIT AMOUNT 2014	+	_____	_____
from Form 5695 line 2b	TAX CREDIT AMOUNT 2015	+	_____	_____

If the total is more than \$500 you are not eligible for a Qualified Energy Efficiency Improvement Credit = _____

Where the improvements made to your main home? * YES NO

Insulation material or systems primarily designed to reduce heat loss or gain **(does not include installation)** _____

Exterior windows including skylights **(does not include installation)** _____

Exterior doors **(does not include installation)** _____

Metal roof with appropriate pigmented coatings designed to reduce heat gain **(does not include installation)** _____

Residential Energy Property Costs

Energy efficient building property:

electric heat pump water heater (yields nergy factor 2.0+) **(includes installation)** _____

electric heat pump (HSPF 9+, seasonal SEER 15+, EER 13+) **(includes installation)** _____

central air conditioner **(includes installation)** _____

natural gas, oil, propane water heater (energy factor .80+ or thermal efficiency 90%+) _____

stove that uses the burning of biomass fuel to heat your home or heat water for the use in your home _____

(thermal efficiency 75%) **(includes installation)** _____

Natural gas, propane, or oil furnace (fuel utilization efficiency rate 95+) **(includes installation)** _____

Hot water boiler (fuel utilization efficiency rate 95+) **(includes installation)** _____

Advanced main air circulating fan - natural gas, propane, or oil furnace **(includes installation)** _____

(annual electricity use of > 2% of the total annual energy use of the furnace) _____

Residential Enery Property Credit

*** The Residential Energy Property Credit costs can be your main home or another home or business**

Solar property costs (solar panel or property installed on roof) _____

Solar water heating property costs (solar panel or other property installed on roof, heat water, derived from sun, certified by Solar Rating Cert Corp) _____

Small wind energy property costs (wind turbine,) _____

Geothermal heat pump property costs (Energy Star) _____

Fuel cell property costs (nameplate capacity 1/2 kilowatt+ using electrochemical process and electric only generation efficiency 30%+) _____

Kilowatt capacity of Fuel cell property costs _____
